ROTARIES

bring the work to the workers !

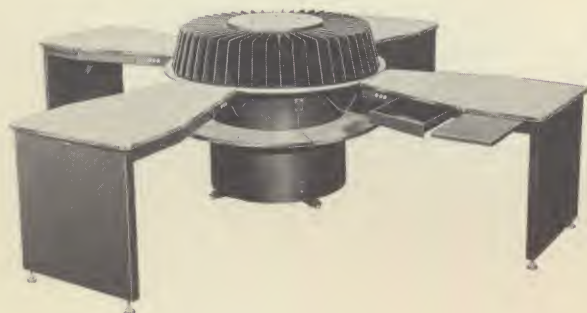

◀ CARD BOOK ROTARIES

Designed to house a multiple number of cardbooks containing many thousands of records. Units are easily rotated either manually or mechanically operated with electric push-button control available for larger units. Provides tremendous capacity in compact area and complete accessibility of records to one or more persons. Many sizes available for dispatching records, reservation bureaus, inventory records, shipment records and other central control reference and posting requirements.

MOTORIZED ROTARIES

#50T MOTORIZED CABLE BOOK ROTARY with adjustable work positions which are easily moved to any point around circumference; circular enclosure around skirt is designed for telephone equipment and electronic secretaries convenient to each position; Rotary capacity 50 books; six table positions maximum on 50T; "NEVAMAR" work surfaces; drawer and sliding shelf may be converted to open from opposite side of work position.

CARD ROTARIES

Engineered to meet capacity and floor space requirements of the individual office, spinning sizes and combinations are available for every purpose either motorized or manually operated. Tremendous capacities approach $\frac{1}{4}$ million tab cards filed to rotate within easy reach; personnel movement is minimized. Added feature of rotary is the stationary Micarta top work shelf.

◀ ORDER DISPATCHING ROTARIES

For organizing and simplifying assignments of work order, service and repair calls, etc. Dispatcher has all the material within easy reach to give out orders to men in the territories, saving time and avoiding overloads and delays in one district while others are slack.

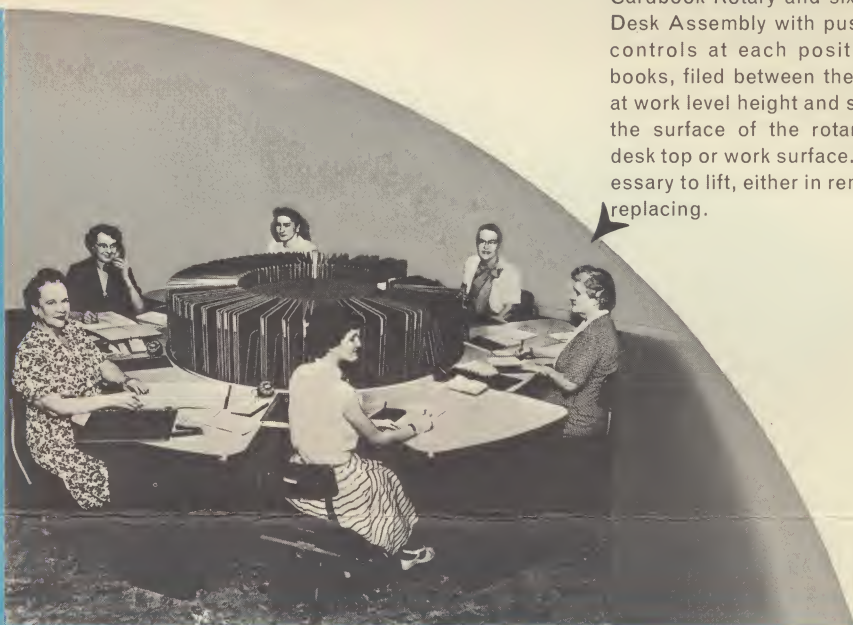

A triple tier rotary, manually operated, controls work dispatching for the service department of a major business machine manufacturer. The circular Micarta topped table has recessed switch keys and dials for six dispatchers. Time clock keeps record of work crews.

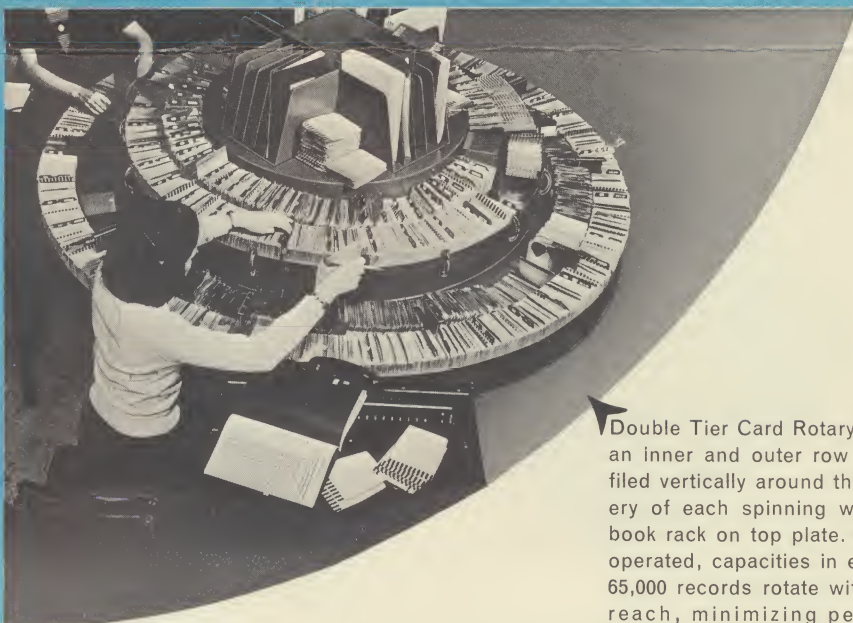

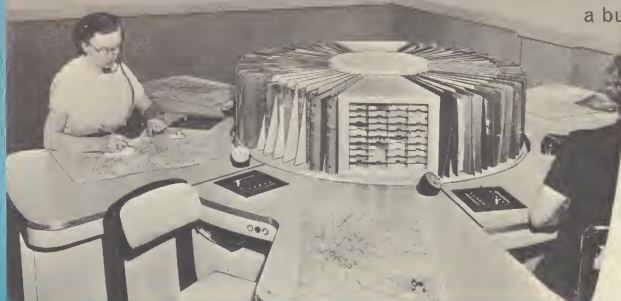

Major railroad places and locates all freight cars with one six-position motorized rotary control station. Binders and sheets of tabulated information from E.A.M. tab runs are filed between fin spacing clearly indexed for easy identification. Rotary unit carries a tremendous amount of tabulated data within finger-tip reach—equally accessible to six persons.

SEVERAL **ACME VISIBLE** ROTARY INSTALLATIONS

ACME VISIBLE #75-T-2 Motorized Cardbook Rotary and six-position Desk Assembly with push-button controls at each position. The books, filed between the fins, are at work level height and slide from the surface of the rotary to the desk top or work surface. Not necessary to lift, either in removing or replacing.

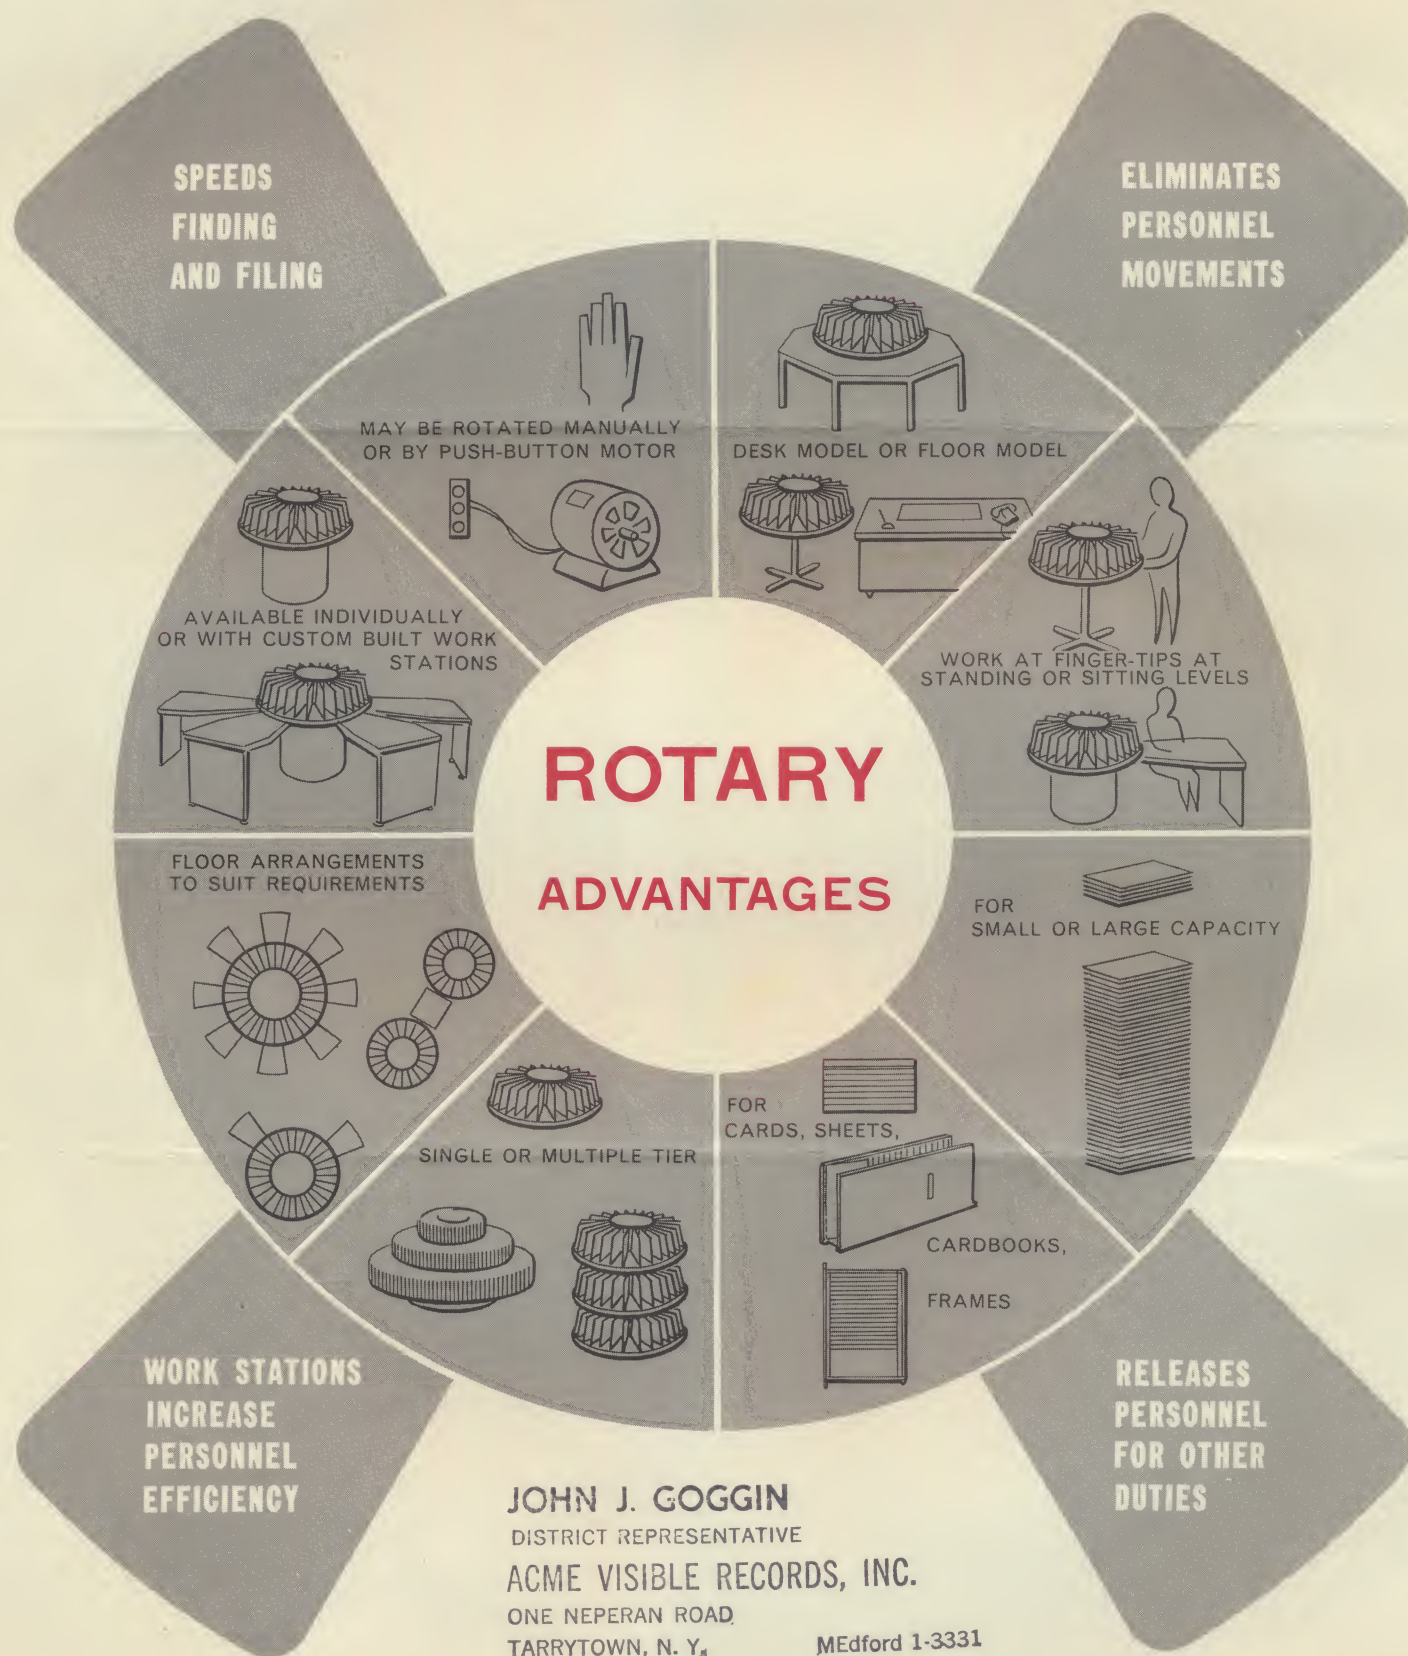

Schedule and information center for the buses and streetcars in our nation's Capitol is staffed by six operators handling 1,200 telephone inquiries per day and referring to forty different schedule information books that cover the various routes. Pigeon hole cabinets hold individual pocket schedules addressed to customers between calls. Circular desk positions offer spacious work area for transit maps of the city spread before each operator. Motorized rotary makes all books available to all operators with a touch of a button.

Double Tier Card Rotary features an inner and outer row of cards filed vertically around the periphery of each spinning with cardbook rack on top plate. Manually operated, capacities in excess of 65,000 records rotate within easy reach, minimizing personnel movement.
